## LIST RESOURCES NEEDED FOR COMPLETION

## ROCK CLIMBING TIPS

1. Start early by identifying obstacles that need to be overcome and resources that you will need to complete your Rocks.
2. Review Rock Steps in your Weekly Meetings to ensure that milestones are achieved and that your Rock stays on track.
3. Work as a team, communicate often, hold each other accountable and help each other stay on track.
4. Get started. Sprint at the beginning of the Quarter so you don't have to sprint at the end.
5. Be completely open and honest in your Weekly Meetings about the progress you are making on your Rocks. Be willing to call out a peer if you sense that their Rock is not on-track.
